

THE FAST & SECURE WAY TO SHARE HOME LOAN DOCUMENTS

FinanceVault is a secure file sharing portal that allows home buyers to share information and documents with their mortgage broker, safely and securely.

How FinanceVault Works: 5 Steps To Simplify Your Home Loan Application

Step #1 Document Request

Your mortgage broking team will send you a **FinanceVault** request via email.

Step #2 Get Started

You log in to **FinanceVault** via a unique link plus 2-Factor Authentication.

Step #3 Document Upload

You upload the information and documents requested.

Step #4 Clarification

Your broking team will review and revert back with any questions or clarifications.

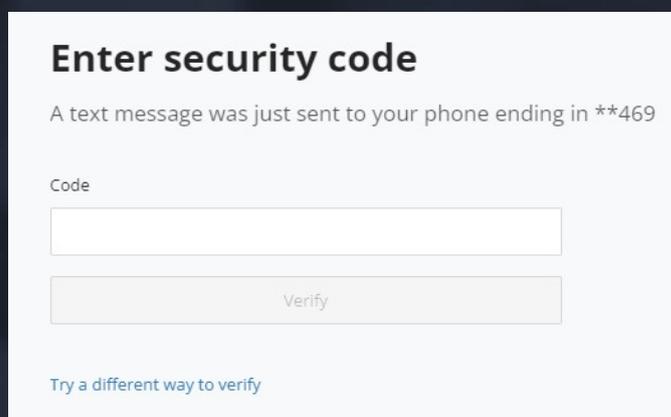

Step #5 You're Done!

Sit back and relax...your broker has everything they need to proceed with your loan application.

Your Information Is Safe And Secure

Safeguarding your privacy is at the heart of everything we do. Your information will only be shared with your broking and lending teams for the purpose of arranging finance.

- ⑥ Two-Factor Authentication (2FA) via your mobile number provides an added layer of security to help ensure your information is always protected.

- ⑥ All information and documents within **FinanceVault** are encrypted for added peace of mind.
- ⑥ **FinanceVault** is hosted on industry-standard Amazon Web Services (AWS) servers that incorporate enhanced physical security, fire protection and electronic shielding.
- ⑥ After completion of your loan application, your broker will usually keep your information on file for future reference. Should you wish your information to be deleted, simply contact your broking team and they will action your request.
